

ZNF217 Antibody

Subcategory: Rabbit Polyclonal Antibody

Cat. No.: 252132

Unit: 0.1 mg

Description:

Zinc finger protein 217 (ZNF217) binds to the promoters of target genes and functions as repressor. ZNF217 promotes cell proliferation and antagonizes cell death. ZNF217 promotes phosphorylation of AKT1 at 'Ser-473'. ZNF217 is a component of a histone deacetylase complex that contains HDAC2, KDM1A, CTBP1 and ZNF217.

Isotype: Rabbit Ig

Applications: E, WB

Species Reactivity: H

Format: Each vial contains 0.1 mg IgG in 0.1 ml (1 mg/ml) of PBS pH7.4, 0.5% BSA with 0.09% sodium azide. Antibody was purified by immunogen affinity chromatography.

Alternate Names: Zinc finger protein 217; ZNF217; ZABC1

Accession No.: O75362

Antigen: KLH-conjugated synthetic peptide encompassing a sequence within human ZNF217.

Application Notes: E: 1:10,000-1:50,000; WB: 1:100-1:1,000

The ZNF217 Antibody is used in Western blot to detect ZNF217 in HepG2 cell lysates.

Storage: Store at -20°C. Minimize freeze-thaw cycles. Product is guaranteed one year from the date of shipment.

For research use only, not for diagnostic or therapeutic procedures.
