

## Annexin V Antibody

**Subcategory:** Rabbit Polyclonal Antibody

**Cat. No.:** 250847

**Unit:** 0.1 mg

**Description:**

Annexin V, also called placental anticoagulant protein I (PAP-I), is an anticoagulant protein that acts as an indirect inhibitor of the thromboplastin-specific complex, which is involved in the blood coagulation cascade. Annexin V has a very high affinity for membranes containing the negatively charged phospholipid phosphatidylserine.

**Isotype:** Rabbit Ig

**Applications:** E, WB, IHC

**Species Reactivity:** H

**Format:** Each vial contains 0.1 mg IgG in 0.1 ml (1 mg/ml) of PBS pH7.4 with 0.09% sodium azide. Antibody was purified by Protein-G affinity chromatography.

**Alternate Names:** Annexin V; Annexin A5; Annexin-5; Lipocortin V; Endonexin II; Calphobindin I; CBP-I; Placental anticoagulant protein I; PAP-I; Placental anticoagulant protein 4; PP4; Thromboplastin inhibitor; Vascular anticoagulant-alpha; VAC-alpha; Anchorin CII; ANXA5

**Accession No.:** P55042

**Antigen:** Recombinant human annexin V

**Application Notes:** E: 1:500-1:1,000; WB: 1:100-1:500; IHC: 1:100-1:500

**Annexin V staining in human adenocarcinoma. Paraffin-embedded human adenocarcinoma is stained with Annexin V Antibody (Cat. No. 250847) used at 1:200 dilution.**

**Storage:** Store at -20°C. Minimize freeze-thaw cycles. Product is guaranteed one year from the date of shipment.
