
IL-34 Antibody

Subcategory: Rabbit Polyclonal Antibody

Cat. No.: 253936

Unit: 0.1 mg

Description:

Interleukin-34 (IL-34) was identified through a functional screening of a library of secreted proteins after transfection of an embryonic kidney cell line with recombinant cDNAs. Flow cytometry and monocyte viability assays demonstrated increased survival and/or proliferation of monocytes induced by IL-34 and specific binding of IL-34 to CD14+ monocytes. IL-34 is a second ligand to the colony stimulating factor (CSF)-1 receptor in addition to CSF1. Like CSF1, IL-34 stimulates phosphorylation of ERK1 and ERK2 in human monocytes and induces differentiation of bone marrow cells into macrophages. Despite its predicted molecular weight, IL-34 will often run at higher molecular weight in SDS-PAGE.
