ProPure™

## Sino Biological's ProPure™ Endotoxin-Free Proteins

**Endotoxin levels < 0.05 EU/mg, which exceed the industry standard**

- Integrate endotoxin control throughout the entire production process.
- Ready to use, no reconstitution is needed.
- Ideal for animal immunization, cell-based assays, and preclinical studies.

\* For all ProPure™ products, we guarantee endotoxin levels < 0.5 EU/mg.

**Covering ADC targets, cell therapy-related, immune checkpoints, cytokines, viral antigens, etc.**

### Main Applications

Preclinical Studies

Animal Immunization

Cell-Based Assays

Any Sensitive Bioassays

### Our Assurance of Quality

Endotoxin-free plasmids

Endotoxin-free buffer with filtration

Low endotoxin-affinity plastic containers

Regular Clean-in-place (CIP)

## Endotoxin-Free Protein/Antibody Production Service

**Customized antibodies & proteins delivered in as fast as 2 weeks, <0.05 EU/mg endotoxin level**

- Mammalian platforms: Mammalian expression system to ensure minimal endotoxin levels
- Scalable production: 24 well plates to 25 L bioreactors for your screening to production level protein needs
- Superior quality: >90% purity by SEC-HPLC, < 0.05 EU/mg endotoxin level
